Reading:

Our next novel will be The Lightning Thief to support our unit on Mythology. The students are very excited about this unit. We will have various non-fiction books about the Greek myths to accompany our novel. **The students are expected to read 15 minutes each night. Your signature in the assignment book verifies this.**

English: Unit 4

We are finishing our Unit on Adjectives. The students will begin a unit on capitalization and punctuation. This unit covers commas, interjections, quotations, abbreviations, and titles. Our writing will continue with persuasive essays and prompts encouraging the students to write the pros and cons of an issue. Keeping a journal at home will enhance their writing skills.

Math: Unit 5

Unit 5 covers fractions, decimals, and percents. The students will order fractions, find equivalents, and convert them to decimals and percents. We will also work on different types of graphs. **Students are expected to practice math facts for 10 minutes each night. Your signature in the assignment book verifies this.**

Science/Social Studies:

Science Fair has started. The students will also work on Physical Science this trimester. In Social Studies, we will learn about explorers.

I WANT YOU
to check out this website!

Website of the Week

Students can access their Science and Social Studies books online at:

Science: www.macmillanmh.com
S.S: www.harcourtschool.com/ss1

Notes from the Teacher:

Students are working on Science Fair from now until February. The Science Fair is scheduled the 2nd or 3rd week in February. The students need to complete the actual experiment at home. We will be doing the paperwork and the Science boards at school.
