

Math

6th grade – The students will be starting Chapter 6 on multiplying decimals and fractions. Many are struggling with facts, multiplication, addition and subtraction. Any help you can give at home to assist your child make this concept easier, would be great.

7th grade –The house project is due January 10th. Please have your child use the rubric to make sure the project is complete. We will be working for the next couple of weeks out of Chapter 5 and learning to solve one step equations algebraically. We will then move on to Chapter 7 which includes many of the concepts we have already learned with area.

8th grade – The students are continuing their study of slope throughout this month. Some of the concepts were learned last year. In eighth grade, the students will do a more in depth study.

Science

Middle school students will be mainly working on science fair, typing and putting on the finishing touches. Please follow the schedule sent home in October for important information. The fair is February 7. Parents will be able to view the projects from 1:00 until 2:30 on that day. Award winners will be announced around 2:30.

Thank you for all your support!
